- ▶ MORE...

## the LearningServer revolution

### SIMPLIFY YOUR LAUNCH

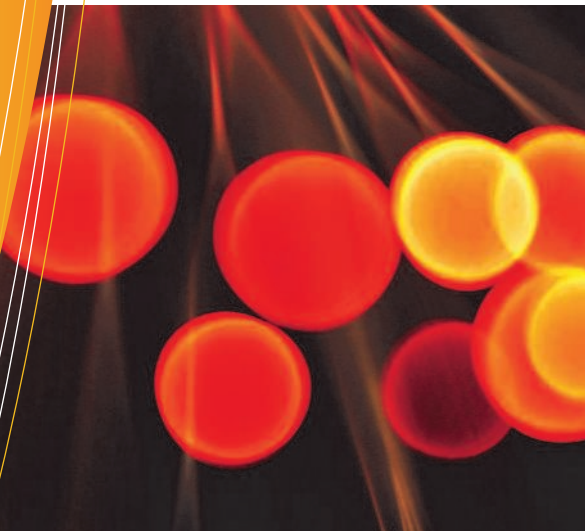

Because the LearningServer grows with you and your enterprise, you can keep the initial roll-out simple, and enable the additional capabilities whenever you require. This approach will help insure the success of your e-learning initiative.

### POUR ON THE POWER

Powerful LearningServer LMS Collections add functionality when you need it. Add any of the collections to your Learning Management System (LMS) at any time. Currently there are four collections available including Content Management, Collaboration, Career Development and Enhanced Management.

### ONLINE AND INSTRUCTOR LED TRAINING

LearningServer manages events including learning activities that take place outside the online classroom such as seminars, in-person classes, live online synchronous meetings or media-based events. Outlook calendar integration, automatic wait-listing and email notification help streamline the event management process.

## MULTI-PORTAL AND MULTI-LINGUAL

Easily create a unique branded learning experience for each of your divisions and channel partners all while leveraging the same system resources. Each portal and each learner may choose from one of the built in languages to further personalize the learning experience.

## .NET OR SHAREPOINT

LearningServer offers unprecedented flexibility starting with your current IT environment. You choose which solution best fits your needs today. No need for concern, you can

change platforms at any time. LearningServer for SharePoint provides organizations with a powerful eLearning platform that integrates seamlessly with existing Microsoft SharePoint installations. Leverage SharePoint's powerful document management capabilities to streamline and secure your e-learning content.

## OVER 2 MILLION LEARNERS IN 43 COUNTRIES RUNNING ON 2,000 IMPLEMENTATIONS

## HOSTED OR PREMISE-BASED SOLUTIONS

Our hosting service offers a secure, reliable way to launch and maintain your learning solution with minimal impact on internal IT resources. Intranet support also allows organizations to install LearningServer behind the firewall.

## PROVEN LEADER

Meet And Train is an e-learning solutions provider with more than 20 years of combined field training success. Founded in 2003, we create consistent results for our clients by leveraging the best of breed Internet solutions while preserving the value of the human element in training.

## WEB SERVICES

LearningServer quickly connects with other enterprise systems including HRIS, Payroll and CRM. With Web Services, you have remote control over LearningServer to manage users, course registrations, event registrations, and even retrieve detailed information from the LearningServer database.

## MANAGEMENT REPORTING

Managers and Administrators can choose from a variety of standard reports to generate compliance, learner usage and status reports based on user hierarchy groupings. All of the reports are exportable to Excel, HTML, XML and text file types
